

Clearwater Gas System

- At a time when most utilities are reducing services, Clearwater Gas System continues to be a full-service utility, providing a complete line of gas appliance sales and service, installation and repair services to residential and commercial customers.
- Connected 1,413 new customers and added over 16 miles of new underground gas main for a system total of 685 miles of main.
- Provided natural and propane gas to 17,522 total customers in 17 municipalities in northern Pinellas and western Pasco counties.
- Added improved service reliability by developing double-feed gas main systems along north and south boundaries of our service territory.
- Achieved natural gas service reliability of 99.9997%. Clearwater Gas customers on average can expect to be interrupted less than 30 seconds per year.
- Partnered with Clearwater Housing Authority in North Greenwood Apartment renovations to utilize tankless natural gas water heaters showcasing state-of-the-art natural gas technology achieving energy efficiency in a public housing application.
- Assisted with redevelopment of the Clearwater Mall project, providing natural gas service to 12 new commercial accounts.
