- Connected approximately 6,400 new customers and added more than 80 miles of new underground gas main (total - 750 miles of main) within the last five years. Provided natural and propane gas to nearly 19,000 customers in 18 municipalities in northern Pinellas and western Pasco counties.
- Added 55 square miles to Clearwater Gas System territory in the Land O'Lakes area of central Pasco county with the potential of more than 25,000 homes added during the next 20 years.
- Improved service reliability by expanding a double-feed gas main system and installing interconnects along the north and south boundaries of our service territory. On average, Clearwater Gas service is interrupted less than 30 seconds per year – a 99.999% service reliability rate.
- Continued to offer a complete line of modern, energy efficient gas appliances with installation and maintenance services performed by a staff of trained technicians.
- Recognized by the American Public Gas Association as having the best Gas Safety Program in the nation.

This early gas tank served Clearwater citizens as Clearwater Gas System built the customer base it enjoys today.

This vehicle once helped to serve Clearwater Gas customers.
