

Communications Services/ Sales Tax

This graph combines the Local Government Half-Cent Sales Tax and the Communications Services Tax.

Under the Local Government Half-Cent Sales Tax Program, the State of Florida returns 9.653% of sales tax proceeds to cities and counties. Sales tax revenues have been increasing by an average of 3.7% per year for fiscal years 2000/01 - 2004/05, despite the slower economy. In fiscal year 2006/07 Sales Tax Revenues will generate an estimated \$6,748,430 for the General Fund, a 7% increase over fiscal year 2005/06 estimates.

Effective October 1, 2001, the Communications Services Tax Simplification Law replaced certain franchise and utility fees. This law is intended to simplify the tax structure for telecommunications and cable services. These revenue receipts have been very inconsistent thus far. They were \$820,000 more than anticipated in 2002, then \$1.1 million and \$1.3 million less than anticipated in 2003 and 2004. Receipts for 2005 were almost \$600,000 more than anticipated. Fiscal year 2006/07 receipts have been budgeted at almost the same level of 2005/06 based upon estimates provided by the Department of Revenue.

The anticipated receipts of the Communications Services/Sales Tax category will be approximately \$13,297,890 in this fiscal year, representing 10.9% of General Fund Revenues.
